4 November 1996

To whom it may concern

Wanganui Welldrillers Ltd

I have pleasure in recording that Wanganui Welldrillers Ltd successfully undertook the drilling of two water bores lined with 330mm casing to a depth of approx. 280 meters during 1994/1995 for the Rangitikei District Council in Marton. At the time I was the Services Manager for the Council and was the Project Manager for the work.

These bores were undertaken in a very efficient and professional manner, and were completed within budget and on time. Both sites involved difficult drilling conditions, and the problems encountered were handled very competently and quickly. The work included developing, flow testing and the lining of the bores.

I have no hesitation in recommending the abilities of Wanganui Welldrillers Ltd and Mr Lyle Sharatt in particular. At all times I found them co-operative and easy to work with.
